

## How To Measure For Replacement Gaskets

The three images below are provided to help you accurately measure for your replacement gasket. The correct replacement gasket starts with a precise measurement of the height (or length) and width of the gasket. A perfect fitting gasket will seal like new!

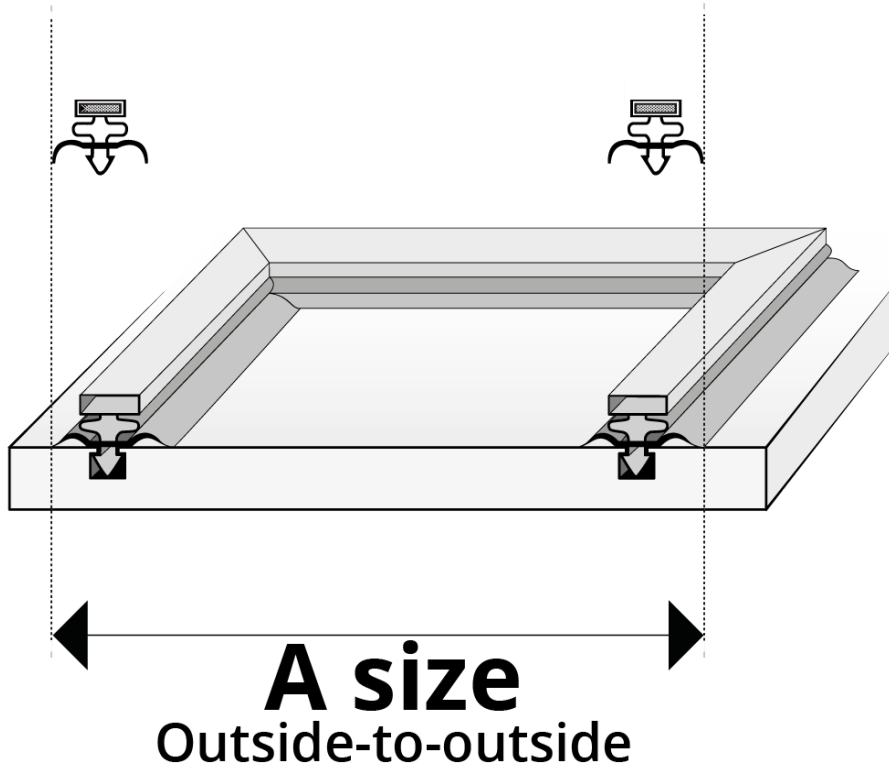

- On all gaskets, measure from outside corner to outside corner. (As shown on the picture below) .
- **IMPORTANT >>>Record measurement to the closest 1/8"**.
- Gaskets are secured to the doors using different methods:
  - Dart mount, retainer mount, and under panel mount.
  - In all cases measure from outside corner to outside corner
- Specify if the gasket is 3-sided or 4-sided
